TCS Open Ignite

About **Software Engineering Industrial Practice Micro-degree**

This micro-degree is a logical culmination of employment focussed learning mission by TCS. For a nominal fee, students can appear for a proctored exam in a centre close to their home and aspire to get a certificate from TCS Ignite endorsing their employment-ready IT skills. The top percentile students, as per the pre-decided cut-off, will earn an opportunity to be interviewed for a job at TCS.

Why are we offering this Certification?

Over 1,00,000 science students enrol in our portal every year and gain IT skills. Many of the active learners have been requesting us to give them a certificate for the skills they have gained. They feel it will be very useful in getting a job in the industry.

To enable this, we have launched the micro-degree in Software Engineering.
