

WEST BENGAL STATE UNIVERSITY
B.Sc. Honours/Programme 3rd Semester Examination, 2021-22

MCBHGEC03T/MCBGCOR03T-MICROBIOLOGY (GE3/DSC3)

Time Allotted: 2 Hours

Full Marks: 40

*The figures in the margin indicate full marks.
Candidates should answer in their own words and adhere to the word limit as practicable.
All symbols are of usual significance.*

Question No.1 is compulsory and answer any *four* from the rest

1. Answer any *four* questions from the following: 2×4 = 8
 - (a) In what respect is the formation of λ dgal transducing phage similar to the formation of F' ?
 - (b) What is the difference between missense and nonsense mutation?
 - (c) Name the structural genes present in lac operon.
 - (d) Why the strands in a double stranded DNA are arranged in antiparallel way?
 - (e) What is the significance of promoter sequence in prokaryotes?
 - (f) What is Shine-Dalgarno sequence?
 - (g) What do you mean by Multiple Cloning Site (MCS) of a cloning vector?

2.
 - (a) What is the difference between prokaryotic and eukaryotic transcription? 2
 - (b) Write a short note on Rho-dependent termination of transcription. 3
 - (c) Mention the role of sigma subunit of RNA polymerase. 2
 - (d) What is ribozyme? 1

3.
 - (a) Calculate the T_m of a 50 bp long ds DNA having 30% GC content. 2
 - (b) What is nucleosome? 2
 - (c) How does the negative supercoiling in a DNA supports its replication? 2
 - (d) Why T4 DNA ligase is preferred over *E. coli* DNA ligase during molecular cloning? 2

4.
 - (a) How does corepressor regulate lac operon? 3
 - (b) Write a short note on Type-II restriction endonuclease. 2

- (c) Who was the discoverer of conjugation? 1
- (d) Define the term 'Gratuitous Inducer' with reference to lac operon. 2
5. (a) All enzymes have their specific substrate, while, DNA polymerase accepts all the four dNTPs as its substrate. Explain the fact with respect to its substrate specifying. 2
- (b) What is the difference between transformation and transduction? 2
- (c) What is the difference between generalized and specialized transduction? 3
- (d) Who had first ever discovered that the mode of DNA replication is semi-conservative? 1
6. (a) Explain the mechanism of X-ray and mustard gas as mutagen. $1\frac{1}{2} + 1\frac{1}{2}$
- (b) What is silent mutation? 2
- (c) What is intercalating agent? Give example. 2+1
7. (a) What is the role of amino acyl t-RNA synthetase and peptidyl transferase in translation? 4
- (b) What is the importance of stop codon in translation? 2
- (c) What do you mean by charging of t-RNA? 2
8. (a) Suppose you have started a PCR reaction with N number of DNA molecule. How many numbers of DNA would you expect after 'X' cycle of PCR reaction? 2
- (b) What is the significance of counter selection marker in $Hfr \times F^-$ cross? 2
- (c) What is merodiploid? 2
- (d) What is the role of alkaline phosphatase in recombinant DNA technology? 2

N.B. : *Students have to complete submission of their Answer Scripts through E-mail / Whatsapp to their own respective colleges on the same day / date of examination within 1 hour after end of exam. University / College authorities will not be held responsible for wrong submission (at in proper address). Students are strongly advised not to submit multiple copies of the same answer script.*
