Action Taken Report

Online Feed-Back was collected from students, alumni and teachers of the college. They were analyzed and the analysis was put up on the college website. There were some issues regarding teaching-learning methods of the college, which were raised in the meeting of the college Governing Body. The G.B referred those issues to the Academic Subcommittee.

It has been observed that students were more or less satisfied with the curriculum delivery of the college. However, there were some confusions among some parents regarding online classes and mode of teaching using ICT. As the college was closed during the entire period due to Covid, parent-teachers' meetings could not be held. However, the queries about the syllabus were referred to the concerned Board of Studies, who discussed those issues and mostly, reduced the syllabus of the semester. Again, some students could not attend online classes regularly due to connectivity issues. For them, the recordings of the classes were sent via whatsapp.

Teachers were more or less satisfied with the curriculum; though some of them faced difficulties due to connectivity issues. Their concern with the curricula was communicated to the concerned Board of Studies.
