

ONE DAY STATE LEVEL SEMINAR ON MATHEMATICS FOR ALL

About the Seminar

Mathematics for All is a philosophy that believes in providing equal opportunities for learning mathematics to every individual regardless of their background, abilities or interests. It aims to make mathematics accessible, engaging and relevant to all students by promoting an inclusive, student-centered approach to teaching and learning mathematics. By incorporating real-life scenarios and problem-solving activities, Mathematics for All helps students develop critical thinking skills, creativity and confidence in mathematics. The goal is to create a generation of individuals who possess strong mathematical literacy and are able to apply mathematical concepts in their everyday lives.
