TWO DAY NATIONAL LEVEL WORKSHOP ON QUANTITATIVE ANALYSIS IN SOCIAL SCIENCES BY SOFTWARE

About the Seminar

Quantitative analysis in the social sciences refers to the use of numerical and statistical methods to study social phenomena. Software is frequently used to aid in the collection, organization, and analysis of data. For example, statistical software such as SPSS, SAS, and R are widely used to perform complex analyses, such as regression, factor analysis, and structural equation modeling. The use of software has greatly improved the efficiency and accuracy of quantitative analysis in the social sciences, enabling researchers to process large amounts of data and generate meaningful insights into social behavior and attitudes.

Guest Speakers:

Dr. Priya Ranjan Dash, Department of Statistics, Utkal UniversityDr. Pranam Dhar, Department of Commerce & management, WBSUDr. Tirthankar Ghosh, Dept. of Statistics, Viswabharati University

10th - 11th May 2019

Event Organizers:

Department of Geography and IQAC

In collaboration with:

WBSU, Indian Academicians and Researchers Association and Visvabharati University

SAROJINI NAIDU COLLEGE FOR WOMEN

30, Jessore Road, Kolkata - 700028 www.sncwgs.ac.in
